Ta çhentagyn jiargey er ny voaddey ooilley mygeayrt oirr yn crater as çhenjean mooar ayns y vean.

I spent most of last month in Iceland, on a course to learn the ancient Norse tongue of the island. Here are some things I learnt about the country:

1. There are seven geothermally-heated public swimming pools in Reykjavík as Icelanders like to go after work and sit in the hot pot after work and chat like people here go to the pub. All these pools are outdoors and winter snow and storms don't put people off!
2. Food and drink cost at least twice what they do in the Isle of Man, even from the bargain supermarkets. Look out for 'happy hour' offers in restaurants and pubs. Books mostly cost three times more. You can pay the equivalent of £30 for a flimsy paperback children's book.
3. Nevertheless, Icelanders print, buy and read more books per capita than any other nation. In the months leading up to Christmas most books are published and sold in the *Jólabókaflóð*, 'the Christmas book flood'. People give these books to each other on Christmas Eve and then go to bed to spend the night reading them.
4. Cats wander everywhere in Reykjavík as if they owned the city.
5. Though the country is so small, several films in Icelandic are made each year. In Bíó Paradís in the centre of Reykjavík you can watch old and new Icelandic films with English subtitles all summer.
6. If you see an Icelandic film or cartoon, be warned that Icelandic humour is rather unique...
7. You can't visit Iceland without tasting the twisted doughnuts called *kleinur*. They are slightly hard, not too sweet and have a slight lemony, cinnamony flavour to them.
8. For some reason Icelanders are very fond of a kind of chocolate biscuit similar to Kit-Kat called Prince Polo, which is actually from Poland. It seems that Polish fishermen brought them originally. There is also an Icelandic singer called Prins Póló.

9. The Westman Islands (Vestmannaeyjar) have a special place in Icelanders' hearts. The 'westmen' were Gaels or Irish, from the 'west' from the point of view of Norwegians, although Iceland is further west than Ireland; two hundred Gaelic slaves who had fled to the islands were caught and massacred there. Today the main island is prosperous again from the fishing industry after the volcanic eruption of 1973 which attracted the world's attention and created a new mountain on the edge of the town and buried many houses under lava and ash.

10. But for Icelanders *Pjóðhátið* ('the national festival') is the most significant thing about the islands. Thousands of people from the mainland travel to the island to camp in an old volcanic crater or this music festival over the first weekend of August. A new song is composed for the festival every year and the crowds are led in singing by a well-known local figure and former MP who has led proceedings for many decades, apart from a spell in prison for financial misdeeds! Red flares are lit around the crater rim with a huge bonfire in the middle
